

# Real°Pac™ Office

**The Best Conveyancing Package on the Market!**

## The Competition

Feature	Real°Pac Office	Competition
Object-oriented with conveyancing business rules accessible externally (outside of the source code)	Yes. Screens are compiled into container objects. Scripts control 98% of all business logic.	No or limited.
Word processor independent – compatible with any modern Word Processor	Yes. Any RTF-compatible Word Processor – from Word 2.0 up to 2000, and Corel WordPerfect, plus Lotus WordPro.	No. Documents and macros must be converted and modified for each major revision of Microsoft, Corel or Lotus Office.
True native Windows application	Yes. Compiled EXEcutables using native Windows calls and methods. Not written as a third-party DBMS “add on” tool.	No (or limited). Most other packages use on FoxPro, Paradox, Access, bTrieve or other such DBMS packages as the development environments.
Dialog and error messages may be directly printed or e-mailed	Yes.	No or limited.
Multiple print queues for different documents and versions	Yes.	No or limited.
Batch printing of documents based on query or user criteria	Yes.	No or limited.
Index output may be printed, e-mailed or saved in HTML format for Intranet posting.	Yes	No or limited.
User or site settings control all aspects of program execution, including which Steps (screens) should not be visible.	Yes	No
Built-in, integrated Scheduling, Event and Document Tracking, Check writing and posting.	Yes	No or limited.
Multiple document versions and almost unlimited document generation and storage capacity.	Yes	No or limited.
Automatic back-up of last file’s version (for automatic undo of current session’s changes)	Yes	No
Automatic save of file (without needing to perform a File Save operation)	Yes	Limited.
File recovery on an individual file basis – no need to recover entire database with large down-time for users.	Yes	No or limited.

*The above table essentially compares Real°Pac with the following competitive packages: TitleQuest (Paradox/Windows), AIM, SoftPro (DOS), Standard Conveyancer (Foxpro/DOS and Windows), ABC (VBA/Access-Windows MS Office), ProDocs, EasyClose, BlackAcre (bTrieve/West-Windows and DOS), ProForm (Softpro Windows), WinClose (Windows Corel).*
