

Hardware and Software Platforms

Client Workstation Hardware Requirements

	<i>Recommended</i>	<i>Minimum</i>
Processor	Pentium 166 MHz	Pentium II 266 MHz
RAM	128 MB or Higher	64 MB
Hard Drive	200 MB free space on either <i>server</i> or a <i>stand-alone</i> computer; 25 MB free space on local drive for a <i>client</i> computer	85 MB free space on either <i>server</i> or a <i>stand-alone</i> computer; 8 MB free space on local drive for a <i>client</i> computer
CD Drive	Real°Pac Office is installed from CD either onto a server, or on a stand-alone PC.	
Monitor	Color SVGA with 800 x 600 resolution	Color VGA with 640 x 480 resolution
Modem or Internet	For Modem-based Internet: 33.6Kb 56Kb baud on at least one computer. For Internet: DSL (async or sync) 192KB or faster, or fractional/full T-1, or cable-modem	28.8K baud modem
Printer	Windows-compatible laser printer – HP Laser Jet or compatible PCL 5 printer control language or higher. <i>Note:</i> Some printers may require additional RAM.	
Important	40MB is space reserved for the software and roughly 100 files. On average allow 10MB for every 150 files.	
<i>Note</i>	Please note that like any Windows product, UniComp's products are enhanced when the processor power (MHz) and system RAM (Random Access Memory) on the desktop workstations and/or on the server(s) are increased. If you need assistance with your hardware in any way, <i>please let us know</i> . The more we know about your computers, the better we are able to serve you!	

Client Workstation Software Requirements *The Microsoft products must be installed on each client workstation:*

Microsoft Windows – 95, 98, NT 3.51, 4 or 5 (2000) <i>Note:</i> Windows ME is <i>currently</i> not supported due to this operating system's anomalies.	pcANYWHERE for modem support, or Citrix ICA Client , or Windows Terminal Services Client and Server , or equivalent, to be implemented on at least one client workstation (or server); extra copies of third-party, on-line client support software may be desirable based on individual user's sites' requirements.
Microsoft Word – any version from 2.0c to 9 (2000)	As needed – appropriate Windows Printer Driver

Network and Server Requirements

File Server	Novell Netware or Windows NT File Server for the Access version. Windows NT Server for the higher-end SQL version. Peer-to-peer Windows Microsoft Network also supported for lower-end networks (LANs).
<i>Minimum</i>	Dual processor server if functioning as a domain controller.
<i>Minimum</i>	File server functioning as PDC with SQL Server installed, configured with 256 MB (or higher) total RAM, with 128 MB allocated to SQL Server.
Database Server	Real°Pac (1-15 users) – stores the Microsoft Access database on the network file server. Real°Pac (16+ users) – requires Microsoft SQL Server 7.0 as the database running on Windows NT Server.
<i>Note</i>	Add an additional 16 MB for every 20 users over 60 to the server minimums listed above.
Backup	Any reliable, certified solution using tape, DAT tape, CD-ROM (CD/RW) or iOmega zip disks.
