

The Best

Conveyancing Package on the Market ...

Because your real estate practice is more than just forms!

Real°Pac™ for Windows™

Real°Pac's **CHECK°WRITER** seamlessly automates your closing files' IOLTA Account processing—the posting and reconciliation of your files' Receipts and Disbursements.

- Items are dynamically calculated and recalled from financial information entered previously. However, unlike many other packages, you have flexibility in escrowing, splitting or manually adjusting anything!
- Checks may consist of items bundled from the HUD-1, and the bundling itself can be reviewed and modified, if necessary, on a case-by-base basis. Item setup is very flexible and adaptable to any situation.
- Check°Writer can export data to either Intuit's Quicken®, or to our **own Real°Books™** module—Quicken is **not** required, unless you **want** to integrate Check°Writer to Quicken.

UNI°COMP™, Inc.

Software systems that are easy to learn, use and customize.
